Subject: Pre-Regulatory Landfill Sites in Anson County

Dear Mr. Gulledge:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492.

<i><b>ID Number</b></i>	<i><b>Site Name</b></i>	<i><b>Site Address</b></i>
NONCD0000118	Peachland Dump	SR 1404, Peachland
NONCD0000774	W R Bonsal #2	Lilesville
NONCD0000772	W R Bonsal #1	Lilesville
NONCD0000119	Bronson Sand & Gravel Landfill	SR 1744, Lilesville
NONCD0000117	Wadesboro Landfill	HWY 52, Wadesboro
NONCD0000115	Polkton Dump	SR 1415, Polkton
NONCD0000116	Morven Dump	SR 1126, Morven

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, *IHSB Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, <http://portal.ncdenr.org/web/wm/sf/ihb/ihsoldlf>, for your review.

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please email me at [analee.thornburg@ncdenr.gov](mailto:analee.thornburg@ncdenr.gov) or you can call Bruce Lefler at (919) 508-8463

Sincerely,

A handwritten signature in black ink that reads "Analee Thornburg". The signature is fluid and cursive, with the first name "Analee" and last name "Thornburg" clearly distinguishable.

Analee Thornburg

Dexter R. Matthews, Director

Division of Waste Management

Michael F. Easley, Governor  
William G. Ross Jr., Secretary

February 26, 2007

<SAL> <FIRST> <LAST>, County Manager  
County of <MUNICIPALITY>  
<ADDRESS>  
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at [jack.butler@ncmail.net](mailto:jack.butler@ncmail.net) or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" being more prominent.

Mr. Chris Wease  
County Manager  
114 North Green Street  
Wadesboro, North Carolina 28170

Re: Request for Information on old unlined landfills, Anson County.

Dear Mr. Wease,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

County Manager  
Anson County  
Wadesboro, NC 28170

Dear Mr. Jones:

The following recommendations are made as a follow-up to our meeting some 30 days ago, at which time you requested information on the number of solid waste containers needed for a collection system in Anson County.

Anson County has an approximate rural population of 16,000 people which would possibly utilize a container program. In looking at the two types of container systems now utilized in North Carolina, the following numbers of each type would be needed for Anson County.

40 cubic yard system - based on the fact that a 40 cubic yard container would serve approximately 1,000 people per pickup per week - eight sites would be needed.

4 cubic yard system - to provide the same storage space - at least 100 4-yard containers would be needed.

It is the opinion of this office through our experience with container programs throughout North Carolina that Anson County would be better served with a 40 cubic yard system. This system provides limited sites, maximum storage space and the greatest cost effectiveness.

One other subject which should also be mentioned at this time is back-up equipment at the sanitary landfill. Over the years of operation at the Anson County site, there have been many times when the single piece of equipment has been out of service. This has contributed to an intollerable situation. Back-up equipment must be provided through either contract or purchase of additional equipment.

Dear Sir:

The management of residual industrial wastes which may be hazardous, potentially hazardous, or hard to handle, such as sludges, semi-solids, liquids, etc., has become a major problem in North Carolina.

Your assistance is needed to provide the Solid Waste & Vector Control Branch, Division of Health Services, with information on the present status of the management, volume, and composition of these type wastes in North Carolina. This information is needed to develop an orderly and reasonable implementation schedule for Public Law 94-580. The 94th Congress enacted Public Law 94-580 on October 21, 1976. Subtitle C of this Public Law is related to the management of hazardous wastes.

In cooperation with the Environmental Protection Agency, this agency is making a statistical survey of industries in North Carolina to obtain the necessary data for program planning and management of these wastes. A copy of the data collection form is enclosed. It is requested that someone familiar with industrial wastes generated by your facility review the form. The Solid Waste & Vector Control Branch representative that serves your area will contact your company by telephone in the near future to schedule an appointment with your representative so that the data forms may be completed.

If there are questions with reference to this survey, your calls or correspondence should be addressed to:

O. W. Strickland, Program Supervisor  
Solid Waste & Vector Control Branch  
Division of Health Services  
P. O. Box 2091

Dear Mr. Jones:

Your letter of March 12, 1975, has been received.

I am enclosing a copy of G.S. 153A-292 which is self explanatory.

The only county in North Carolina that is providing house to house collection by the county is Dare County. Mr. Jack Cahoon is their County Manager; he could tell you how they finance this program.

The container system that is being used throughout the State is primarily considered a supplement to the disposal program and not a collection method.

If there are other questions or if we can be of assistance, please let us know.

Sincerely,

O. W. Strickland, Supervisor

Dear Mr. Strickland

I appreciate the information and figures that you sent me relative to the cost of establishing a county wide container system for the collection of solid waste in Anson County. Our commissioners have discussed this matter and are seriously considering it, provided that

- (1) Enabling legislation can be obtained which would allow taxing of individual taxpayers an equal amount for this service rather than adding it on to the ad valorem tax levy, and
- (2) That the citizens of the county vote to adopt such a system in which they would tax themselves to provide this service.

The information sheet that you sent me citing GS 153A-292 indicates that authority is given to the commissioners to levy fees sufficient to defray the expense of collection. However, I would appreciate it very much if you could send me a sample bill or a copy of a bill that some other county is using which would provide this method of financing such a solid waste collection system.

I look forward to hearing from you in regard to this matter and would appreciate any suggestions that you might have to offer.

Sincerely yours,

Wadesboro, N. C. 28170

Dear Mr. Jones:

Mr. Dover and I enjoyed our visit with you and Mr. Strickland to discuss a solid waste collection system for Anson County. Let me congratulate everyone that has had a part in providing an approved disposal site for the County. *STR*

I am enclosing an up-to-date estimate as to cost to implement two types of programs. I am also enclosing a copy of Article 15 which will explain the authority the county commissioners have.

There are many different ways used throughout the State to finance solid waste programs but the largest number use tax money.

If this office can be of assistance, please let us know.

Sincerely,

O. U. Strickland, Supervisor  
Solid Waste Management Unit  
Solid Waste & Vector Control Branch  
Sanitary Engineering Section

Dear Mr. Riddle;

I will be in my office, Room 213 Bath Building, on Monday and Tuesday, November 5 and 6, and would be happy to discuss the Anson County landfill plans with you.

Yours truly,

O. W. Strickland, Supervisor  
Solid Waste Management Unit  
Solid Waste & Vector Control Branch  
Sanitary Engineering Section

N.C. State Board of Health  
Sanitary Engineering Division  
Raleigh, North Carolina

Dear Sir,

Our Environmental Geology class at Campbell College is currently investigating the environmental implications of sanitary landfills. Being from Anson County, I am familiar with the landfills of this particular area. I am inquiring if it is possible to receive a copy of the site investigation report which was prepared for the Anson County site near Lilesville. Also, I would like to receive a copy of the operation plans and the intended use of the land after completion of the landfill in accordance with Article 13B of Chapter 130 of the General Statutes of North Carolina. I would appreciate your forwarding a copy to me if this report is available.

If the above request is not possible, I am willing to come to your office to collect the information if you would designate a time. I am also willing to come to your office and reimburse you for any xeroxing and mailing costs. Because time is a crucial factor, I would greatly appreciate it if you could attend this matter at your most earliest convenience.

Sincerely yours,

*Charles H. Riddle*

Mr. Sidney H. Usry  
Sanitary Engineering Division  
State Board of Health  
Raleigh, N. C.

Dear Mr. Usry:

The Town of Polkton is in the process of trying to find a new site for solid waste disposal operations.

Because of a shortage in funds, we are having problems finding a solution to our solid waste disposal. However, we will do something as soon as possible.

Yours truly,

*Frankie Hyatt*

Mr. Michael Elzas  
Campbell College  
Box 742  
Buies Creek, North Carolina 27506

Dear Mr. Elzas:

In reply to your request, I am enclosing a copy of the North Carolina State Board of Health "Rules and Regulations Providing Standards for Solid Waste Disposal." The requirements as set forth in Sections VIII, IX, and X should provide you with the information you requested.

If this office can provide you with additional information, I shall appreciate hearing from you.

Very truly yours,

Sidney H. Usry, Chief  
Solid Waste & Vector Control Section  
Sanitary Engineering Division

Dear Sir

I am a Geology student at Campbell College currently taking Environmental Geology. We have been assigned the project of selecting a county sanitary landfill for Harnett county. Please send me any information you have about what factors to consider in selecting such a site. We are doing this project from an economical aspect as well as an environmental aspect and any advice you have would be greatly appreciated.

Sincerely Yours  
Michael Egan

Dear Sir

I am a Geology major at Campbell College currently taking Environmental Geology. We have been assigned two projects which you may have information about. The first is to select the best possible site for a county ~~solid~~ sanitary landfill for Harnett county. Please send me any information concerning environmental aspects ~~of~~ to be considered in selecting such a site. My second project is the environmental impact of the proposed nuclear power plant that Carolina Power and Light will build in the Raleigh area. Any advice you could give would be greatly appreciated.

Sincerely Yours  
Michael Egan
